MANUFACTURING ACTIVITIES TO START IN FIVE YEARS: GOVT SPV soon for making aircraft in India

PRESS TRUST OF INDIA
New Delhi, September 4

THE GOVERNMENT WILL set up a special purpose vehicle (SPV) to push ahead with plans to start manufacturing commercial aircraft in India, civil aviation minister K Rammoohan Naidu said on Wednesday as he highlighted the potential of the country's fast-growing aviation sector.

The Bharatiya Vayuyan Vidheyak 2024, which was passed by the Lok Sabha in August, includes provisions to regulate the design and manufacturing of aircraft, supporting the Aatmanirbhar Bharat initiative for self-reliance.

"The government is strongly pushing the idea of India manufacturing its own planes," Naidu

■ India wants to be a big player in manufacturing and also exporting planes, said the civil aviation minister

■ The Bill seeks to remove redundancies and replace the Aircraft Act, 1934

■ State-owned HAL is already into manufacturing small civilian planes but on a smaller scale

K RAMMOHAN NAIDU,
Civil aviation minister

WE WANT TO BE A BIG PLAYER FOR MANUFACTURING PLANES AND ALSO EXPORT THEM

said, adding that a SPV will be set up with industry stakeholders and others.

According to him, efforts are being made to ensure that aircraft manufacturing activities can start

in the next five years, he said.

"We want to be a big player for manufacturing planes and also export them," Naidu said. India is a key market for aircraft manufacturers - Boeing and Airbus.

State-owned Hindustan Aeronautics Ltd (HAL) is already into manufacturing small civilian planes but on a smaller scale.

India is one of the fastest growing civil aviation markets in

the world.

Speaking at a conference organised by industry body PHD Chamber of Commerce and Industry, Naidu also said there is a lot of potential in the country for MRO (maintenance, overhaul and repair) activities.

Noting that the Indian aviation sector is at the "transformative crossroads", the minister also said the aim is to make the country a hub for aviation, air cargo, and MRO activities.

Meanwhile, the Bill seeks to remove redundancies and replace the Aircraft Act, 1934 - that has been amended 21 times - at a time when India is one of the fastest growing civil aviation markets in the world.

INDIA'S PRIMARY STEEL manufacturers including Tata Steel, JSW, AM/NS and state-run SAIL may get a reprieve from the prospect of "unsustainable prices" wiping off their margins, in the form of higher import tariffs on their key products like hot rolled coil (HRC).

Union Steel Minister HD Kumaraswamy said on Wednesday "he will try to convince the finance ministry to raise duties on steel imports to 10-12% from the current 7.5%." The minister also expressed concerns on the manner in which China was dumping steel into India, while speaking at the Fifth Steel Conclave organised by the Indian Steel Association here.

Domestic steel prices have fallen to their lowest levels in over three years, largely due to shifts in the global markets. Data compiled by rating agency ICRA show that at ₹51,200 a tonne, the August (ex-works) price of the benchmark HRC in the Mumbai market was at its lowest since November 2020, when it was ₹45,975 a tonne.

TV Narendran, CEO and MD, Tata Steel recently said that these prices "aren't sustainable," adding that the company expected the trend to reverse in the next few weeks. Similarly, in a results call with the analysts, JSW Steel joint MD and CEO Jayant Acharya said, "The Indian steel imports in Q1 were up by 27% y-o-y, while it was lower q-o-q. But elevated exports from China continue to be a concern. The Chinese production continues to remain higher. Domestic demand is still softer and therefore the excess is flowing out to the world."

Kumaraswamy also stressed on the need to remain vigilant against chal-

lenges such as the global demand slowdown, especially from the ramifications of a demand meltdown in China.

The steel ministry, he said, is committed to ensuring that the journey towards Aatmanirbhar Bharat in steel remains undeterred. "We have seen demand grow at double-digit rates over the last three years, and this year is no exception. At the Ministry of Steel, we are confident in the growth story of Indian steel. However, I understand the challenges that lie ahead," he said.

The minister further said that by investing in the latest technologies and optimising the processes, the carbon footprint can be reduced significantly.

"Hydrogen holds immense potential as a clean fuel for steel production. While there are challenges to overcome, we must invest in research and development to accelerate its commercialisation," the minister added.

According to steel ministry data, China contributed 30.5% of India's total imports during the April-June period of the current year, compared with 28.4% a year ago.

E-COMMERCE GIANT FLIPKART on Wednesday announced that it will create over 100,000 new jobs across the country and open 11 new fulfillment centres, ahead of the upcoming festive season and its annual Big Billion Days sale event.

These will be located across nine cities and will add 1.3 million square feet to Flipkart's supply chain infrastructure, taking the total number of such facilities to 83. The company said this expansion will help meet the anticipated surge in demand during the festive period.

The new jobs, which will be created across Flipkart's supply chain operations, include roles such as inventory managers, warehouse associates, logistics coordinators, kirana partners, and delivery drivers. The firm said it will conduct training programmes for the new hires to prepare them for the expected increase in orders.

According to Hemant Badri, senior vice-president and head of supply chain at Flipkart, the expansion of the supply chain network is aimed at meeting customer demands more efficiently. "With our expanded supply chain network, we are poised to meet the growing demands of our customers and provide them with an unparalleled shopping experience," he said.

Flipkart also mentioned that it has been investing in technology to optimise its supply chain operations, with the implementation of automated warehouses and data-driven decision-making systems. India needs 10-20 fabs in 10 years: SEMI CEO

FE BUREAU
New Delhi, September 4

INDIA WILL NEED 10-20 semiconductor fabrication plants over the next 10 years and there is a lot of interest from global semiconductor companies to invest in the country, Ajit Manocha, president and CEO of global semiconductor industry body SEMI, said on Wednesday.

Comments from Manocha assume significance as the government is focussing on growing the semiconductor ecosystem in the country backed by the ₹76,000 crore incentive scheme. The government's plan is also to increase the corpus for incentivising more projects as part of India Semiconductor Mission 2.0, for which the guidelines are in the works.

"This is a rough estimate...if we want to make India a powerhouse for the industry, there is no ceiling on the number. The challenge is to show the compa-

nies the potential for growth, business and opportunities in India," Manocha said.

SEMI will organise the first global conference on the semiconductor ecosystem, Semicon India 2024 from September 11-13 in Noida.

On the amount of capex India should set aside for boosting its semiconductor ecosystem, Manocha said, "India has to see what is their appetite (in terms of additional capex). More the merrier."
